

[Zywall Ipsec Vpn Client Keygen](#)

## Services: DHCP

LAN **DMZ**

**Enable DHCP server on LAN interface**

**Deny unknown clients**

If this is checked, only the clients defined below will get DHCP leases from this server.

<b>Subnet</b>	192.168.1.0
<b>Subnet mask</b>	255.255.255.0
<b>Available range</b>	192.168.1.0 - 192.168.1.255
<b>Range</b>	<input type="text" value="192.168.1.11"/> to <input type="text" value="192.168.1.200"/>
<b>WINS servers</b>	<input type="text"/> <input type="text"/>
<b>Default lease time</b>	<input type="text" value="604800"/> seconds This is used for clients that do not ask for a specific expiration time. The default is 7200 seconds.
<b>Maximum lease time</b>	<input type="text" value="604801"/> seconds This is the maximum lease time for clients that ask for a specific expiration time. The default is 86400 seconds.

**Save**

**Note:**

The DNS servers entered in [System: General setup](#) (or the [DNS forwarder](#), if enabled) will be assigned to clients by the DHCP server.

The DHCP lease table can be viewed on the [Diagnostics: DHCP leases](#) page.

MAC address	IP address	Description
00:00:0a:b0:24:12	192.168.1.10	static for example host
